

California State Parks LWCF Service Area Report

Project ID: 1450
Date Created: 07/26/2014
Coordinates: 40.386, -122.281

This is your LWCF Service Area report for the project you have defined.
Please refer to your Project ID in any future communications about this project.

Project Area Statistics

County:	Shasta
City:	Cottonwood
Total Population:	4,330
Margin of Error:	(+/- 587)
Per Capita Income:	\$ 26,555
Margin of Error:	(see table next page)
# People Below Poverty:	757
Park Acres in Area:	79.40
Park Acres / 1,000 Population:	18.34

Data Sources:
American Community Survey (ACS) 5-year estimates
Parks data from Calif. Protected Areas Database 2013b (Sept. 2013) -
www.CALands.org

Project Area Map

Report Background

The project area statistics have been calculated based on the selected radius (in miles) from the point location of your project. The buffer is referred to as the project service area.

Population and people in poverty are calculated by determining the percent of any block groups that intersect with the service area. The service area is then assigned the sum of all the block group portions. An equal distribution in block groups is assumed.

Per capita income is calculated as a weighted average of the block group values that fall within the service area.

More information on the calculations, and a detailed description of the margin of error are available at:
http://www.mapsportal.org/lwcf/LWCF_Calculation_Documentation.pdf

Parks and park acres are based on best available source information but may not always contain exact boundaries or all parks in specific locations. Parks acreage does not include major lakes or ocean, and may not include recreation facilities where those occupy most of a site. Users can send update information on parks data to:
parkupdates@parks.ca.gov
